

## Advanced Security Technician

Baker Group is searching for an experienced Field Service Security Technician with excellent troubleshooting and problem resolution skills who will be able to support our Card Access, CCTV and Parking Revenue Control customers. This is an exciting and dynamic opportunity, based out of Eastern Iowa that will require limited travel in Iowa to support our customers.

This candidate may be responsible for software programming during installation and also servicing our existing customer base. This candidate will be required to learn our various Access Control Software systems, Parking Revenue Control Systems and Network Video CCTV systems.

The chosen candidate will also have proven Factory Training on Access Control, CCTV, Fire or Parking Revenue Control Systems.

### Additional Requirements:

- Minimum of 5 years proven experience on a major Access Control Line or CCTV Enterprise System.
- Ability to work closely with project managers, contractors, and end users to provide solutions and prompt service while coordinating schedules to maintain on time delivery of products and services.

## Advanced DDC Control Technician

Baker Group is seeking an advanced level DDC Technician to join our team. A minimum of 5 years experience with HVAC & DDC programming experience is preferred. Knowledge of programming systems such as Schneider Electric I/A Series, Barber Colman Network 8000, and/or Tridium AX is also preferred.

Duties include start up, programming, and graphics of DDC systems, day-to-day servicing and maintenance; including diagnoses, repairs, basic to advanced programming and commissioning in HVAC DDC control systems.

This position is based out of Eastern Iowa that will require limited travel in Iowa to support our customers.

Excellent customer relationship, organizational and computer skills are a must. Baker Group offers a competitive wage and benefits, a positive work environment, and long-term training.
